Claims Rejected

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Gaskins '221.

Gaskins shows a variable speed belt transmission 12, a planetary gearing 29, etc, and a sprocket output gear 24 driven by one of the sun gears 32. The planetary gearing is identical to applicants, with a dual pinion planet gear 34, 35, and two sun gears 31, 32 and no ring gear. The belt transmission drives the carrier 26 just as in applicant's invention. The other sun gear 31 receives input power to drive the entire mechanism.

Prior Art Discussed

The examiner has considered the references cited by applicant in his Information Disclosure Statement filed October 6, 2003. None of the references show all of the features of the invention.

The references cited by the examiner are deemed pertinent to applicant's disclosure. Chapman '748 shows a dual power path planetary transmission with a belt transmission and a planetary gear transmission with a dual planet gear, where an input is on one sun gear and the output is taken from the other sun gear, but does not show an output sprocket. Magg '749 shows in Figure 6 another dual power path planetary transmission with a belt transmission and a dual planet gear planetary transmission, but also does not show a sprocket on the output shaft.
